mpered by Lack of Bars-Talk of New Blast Furnaces-Heavy Sales of

ndry fron-Pig Iron Increases. Pittabuno, Dec. 30.—Gradually prices are assuming figures familiar in the early part of 1906 in fron and steel pipe. The demand for steel pipe has been great enough to force, upward the price \$2 per ton. Boiler tubes are quoted \$4 a ton higher. The prices named are those in vogue prior to April, 1905. Three times during the last quarter of 1906 prices on steel pipe have been increased. October 13 \$4 a ton was added to the quotation and November 5 \$2 more was tacked on. The National Tube Company and the independent mills have adopted the new schedule.

The pipe and tube mills of the country

The pipe and tube mills of the country were never so busy as they are to-day. Many of the mills have failed to make the deliveries rdered for 1906, and quite a tonnage will go over into next year. The year 1907 will witness the greatest production of iron and steel pipe in history. This will be due to the demand, to begin with, also to the increased output at McKeesport, Pa., and Lorain, Ohio.

The Pacific Coast is now the largest control of the co

sumer of pipe for oil mains. The independent oil producers of southern California have formed plans for the laying of a pipe line 285 miles long. An inquiry is being made for the delivery of this order during the appring of 1807.

facturers are anxious to advance prices. The American Steel and Wire Company is not prepared to join in the action. Some of the concerns that are filled up with orders beyond

American Steel and Wire Company is not prepared to join in the action. Some of the concerns that are filled up with orders beyond the first six months of 1907 will not accept additional orders at prices quoted. Deliveries to jobbers are not satisfactory and the mills are unable to deliver in greater quantities. Hence bidders for sheets and plates are offering extra cash for early deliveries. There probably never was a time when the jobbing houses and the warehouses of the manufacturers were so low in stock as at the closing of this year.

The American Sheet and Tin Plate Company has not an idle sheet mill and of the 235 tin plate mills 232 are in operation. The others would be running if enough steel could be had to keep them in operation. The oapacity of a number of plants will be doubled during the year by the introduction of the Bray system of handling material. The big Sharon plant is being equipped with the Bray system of handling material. The big Sharon plant is being equipped with the Bray system of handling material. The big Sharon plant is being equipped with the Bray system of handling material. The big sharon plant is being equipped with the Bray system of the introducers are sorely pressed for steel bars.

The Guernsey plant at Cambridge, Ohio, is also being remodelled so as to increase the capacity. The producers are sorely pressed for steel bars.

The mire interests are just as hard up for bars and billets as are the sheet, tin plate, hoop and steel band mills. The independent wire interests are really planning the erection of blast furnaces and a billet mill. The scaroity of ore and coke may hinder the project. But it is essential that a greater supply of steel band mills. The independent wire interests are really planning the erection of blast furnace and a bilet mill. The scaroity of ore and coke may hinder the project. But of the production of ore delivery has soid as high as \$25 per ton during the last week. Standard beseemer aalee have been made at \$24.50 valley furnace, and gray forge from

MINNESOTA IRON SHIPMENTS.

Big Figures for 1906 Exceeded by Estimates for the Coming Year. ments on the Duluth and Iron Range and Duluth, Misabe and Northern roads reach the total of 19,400,000 tons for the year, the latter road having moved almost precisely the allotment of 11,200,000 which was made at the opening of navigation last April. Great Northern shipments were 6,083,000 tons, and ceived the cars it ordered early in the season. This makes 25,484,000 tons out of Minnesota

The old ranges have not been able to increase, and it will be the same next year—the additional tonnage must come of the Mesaba. of Duluth, says the Mesaba range is good for only twenty years at the probable rate of crease, but this view must be considered extreme. Forty years is probably much Minnesota and Michigan, remain to be dis-

Sales of iron ore for next year's delivery have been made of late without much regard to the prices announced as standard for the season. For instance 500,000 tons of Messbahave been closed at 7.77 to 8.6 a unit, with these guarantees: A bessemer guaranteed 54.29 natural and .045 phosphorus at 8.6 and non-bessemers running from \$1.50 to 54.25 natural iron at 7.7 and 7.8 cents a unit.

These sales clean up the mines from which they are made. Messba producers have recently made sales for this fall's delivery and have so delivered at prices fully as high and in some few cases even above these figures. If they had been in position during the last two or three weeks to increase deliveres they might have secured even better prices, but they would not guarantee to deliver, and it is well they did not try, for the closing of navigation has been short and without much warning.

The roads are now preparing to handle ore the coming year on a basis similar to that of 1806, as follows: Duluth, Missbe and Northern, 13,000,000 tons; Duluth and Iron Range, 9,000,000 tons, and Great Northern, 7,000,000 tons, or a total out of Minnesota of 29,000,000 tons.

Shipments out of some of the more impor-

cons. or a total out of Minnesota of 29,000,000 tons.

Shipments out of some of the more important mines of the district have been as follows:
Mountain Iron, 2,536,111; Morris, 1,900,743; Burt, 1,276,374; Lake Superior (Mesaba), 2,257,420; Mahoning, 1,020,000; Stevenson, 1,015,000; Chapin, 947,660; Norrie, 725,831; Aragon, 430,000; Gleveland Cliffs Company, 1,225,265, Newport, 468,848; Aurors, 380,064; Cary, 195,381; Lake Angeline, 266,633. These are but a few of the larger mines on all ranges. The only Canadian shipment was 125,000 tons from the Helen mine at Michipicoten.

THE FINANCIAL SITUATION. Continued from Eighth Page.

pulsory forbearance. Finally, another matter that has produced and is producing uneasiness among financial interests is that to which such graphic and powerful allusion has just been made in the address recently delivered by President Milton H. Smith of the Louisville and Nashville Railroad Company at a public gathering and fully published thereafter in THE SUN. A spirit of unrest, of discontent, of social among the people of the country by the demagogic acts and utterances of those high in political authority, and chiefly by the mischievous conduct of the President of the United States. Right at a time when the railroads are straining their financial resources in order to provide further facilities for meeting the business necessities of the land, granting at the same time an increase of wages to em-ployees on a scale never before known and trying to meet the just demands of their stockholders for such a distribution of dividends as is in some degree comme surate with the present rates obtained for the use of money, they and industrial concerns as well are subjected to all sorts of Government harassments looking forward to a reduction of their earning power. The logical end of such proceedings if continued is not pleasant to contemplate.

THOMAS W. LAWSON.

No investor or speculator in America can afford to miss reading this morning's half-page advertisement.

COPPERS.

BUY TRINITY NOW.

I ADVISE, UNQUALIFIEDLY, THE PURCHASE OF TRINITY STOCK AT ANY PRICE

There is nothing equivocal about this advice, nor was there when I published it to the world one week ago, when

I will continue to repeat this advice, and, in my opinion, investors and speculators will continue to follow it until

Then I will endeavor to prevent its going above 75 until by payments of dividends it is demonstrated to be worth

When, because of increased dividends, it will be worth more, I will endeavor to have the public know how much

Accompanying my advice and the statement that I neither bought nor sold Trinity, directly or on commission, was a list of all the Boston stock exchange houses, to whom I advised all would-be buyers of Trinity to send their orders.

BUY TRINITY NOW.

Since my advertisements these houses have many mail and telegraphic orders to purchase stock, and many inquiries

Some have called attention to the fact that they do not approve of my method of advertising the merits of any

Therefore the half-page advertisements telling the whole Trinity story which are running this morning in the daily press of this country and Europe, and in which I talk right at the stock game with a directness I feel the subject war-

Trinity stock was selling at 11. The average sales every stock exchange day since have been about 20,000 shares and

AS PRESIDENT OF THE TRINITY COPPER COMPANY, AND AS AN INDIVIDUAL,

TO THE INVESTING AND SPECULATING PUBLIC:

the price has steadily advanced until to-day it is selling at 181/2.

Some houses have sought to discourage purchasers of Trinity.

It contains all the names of the Boston stock exchange houses.

more, and its price should become fixed at 100 or over.

as to Trinity's worth and the purchase terms.

It is in some of the papers of your city.

High- Loss- Clos- Net

stock the purchase of which I advise.

Hunt it up, and at once.

Boston, December 31, 1906.
